

FedEx Web Services

# Rate Services

## August 2010

## **Legal and Copyright Notices**

### **Payment**

You must remit payment in accordance with the FedEx Service Guide, tariff, service agreement or other terms or instructions provided to you by FedEx from time to time. You may not withhold payment on any shipments because of equipment failure or for the failure of FedEx to repair or replace any equipment.

### **Inaccurate Invoices**

If you generate an inaccurate invoice FedEx may bill or refund to you the difference according to the FedEx Service Guide, tariff, service agreement or other terms or instructions provided to you by FedEx from time to time. A request for refund on a FedEx shipment must be made in accordance with the applicable Service Guide, or terms or instructions provided by FedEx from time to time. A shipment given to FedEx with incorrect information is not eligible for refund under any FedEx money-back guarantees. FedEx may suspend any applicable money-back guarantees in the event of equipment failure or if it becomes inoperative.

### **Confidential and Proprietary**

The information contained in this guide is confidential and proprietary to FedEx Corporate Services, Inc. and its affiliates (collectively "FedEx"). No part of this guide may be distributed or disclosed in any form to any third party without written permission of FedEx. This guide is provided to you under and its use is subject to the terms and conditions of the FedEx Automation Agreement. The information in this document may be changed at any time without notice. Any conflict between this guide the FedEx Automation Agreement, the FedEx Freight 100-Series Rules Tariff, and the FedEx Service Guide shall be governed by the FedEx Automation Agreement and the FedEx Service Guide, in that order.

# About This Guide

This guide describes how to work with FedEx® Web Services.

It is written for the application developer who uses Web Services to design and deploy applications enabled by FedEx. It describes how to get started with application development and how to use the Application Programming Interface (API). It also describes each available service in addition to the business logic that drives each FedEx process.

## Document Organization

Each Web Service provides access to FedEx features. The service description includes service details and a full schema listing to facilitate application development.

## Resources

The following may also be useful for FedEx Web Services developers:

- FedEx Services At-a-Glance: [fedex.com/us/services/ataglance.html](http://fedex.com/us/services/ataglance.html)
- FedEx Service Guide: [fedex.com/us/services/pdf](http://fedex.com/us/services/pdf)
- Web Services organization home page: [webservices.org](http://webservices.org)
- Microsoft Web Services: [msdn.microsoft.com/webservices](http://msdn.microsoft.com/webservices)
- O'Reilly XML.com: [webservices.xml.com](http://webservices.xml.com)

## Support

For FedEx Web Services technical support, you can reach FedEx at [websupport@fedex.com](mailto:websupport@fedex.com) or call 1.877.339.2774 and state "FedEx Web Services" at the voice prompt. Support hours are Monday through Friday, 7 a.m. to 9 p.m. (CST) and Saturday, 9 a.m. to 3 p.m. (CST). For international customer support, call 1.800.GoFedEx (1.800.463.3339).

# Introduction

FedEx Web Services gives you the tools to build custom platform- and interface-independent applications that access FedEx features. You can use FedEx Web Services in a variety of ways to create customized integration solutions for your specific shipping needs. Here are just a few of the ways a company can use Web Services to streamline operations, improve visibility, and provide more choices to clients:

- **Verify Addresses and Improve Customer Satisfaction:** Prompt customers for additional information in the event of an address discrepancy or missing information with the Address Validation Service.
- **Give Customers More Options:** Help customers learn about all the available shipping options and rates with Ship Service and [Rate Services](#). You can also extend this service to your shopping cart and Website, allowing customers to access money-saving information firsthand.
- **More Convenience:** Use the Locator Service to find the FedEx pickup location nearest your customer. Or, send an e-mail to your customers with a link to this service as part of your standard order-receipt process.
- **Offer Global Shipping Options:** Create shipping labels for worldwide locations. Improve customer service by offering more shipping options to customers in more countries with the consolidated Ship Service.
- **Estimated duties and taxes calculations are now available.** Contact your FedEx account executive for more information.
- **Reduce Customer Service Costs:** Decrease phone traffic from customers checking the status of their shipments and cut customer service costs. FedEx provides online Tracking and Visibility Services that allow you to provide customers with the status of shipments, Signature Proof of Delivery (SPOD), and Shipment Notification in the Ship Request.
- **Simplify Processes and Improve Satisfaction:** In addition to ExpressTagAvailability, provide a simple way to allow customers to return an order with E-Mail Labels. This service sends an e-mail with the address (URL) of a Website where the recipient can log in and print a return label.

Why should developers be interested in Web Services?

- **Interoperability:** Any Web Service can interact with any other Web Service and can be written in any programming language.
- **Ubiquity:** Web Services communicate using HTTP and XML. Any connected device that supports these technologies can both host and access Web Services.
- **Low Barrier to Entry:** The concepts behind Web Services are easy to understand, and developers can quickly create and deploy them using many toolkits available on the Web.
- **Industry Support:** Major content providers and vendors support the Web Services movement.

Any application running on any platform can interact with a Web Service by using the Simple Object Access Protocol (SOAP) and Web Services Description Language (WSDL) standards for message transfer and service discovery. By following the standards, applications can seamlessly communicate with platform services.

## Document Overview

This guide provides instructions for coding the functions you need to develop FedEx-supported applications. The following chapters make up this guide:

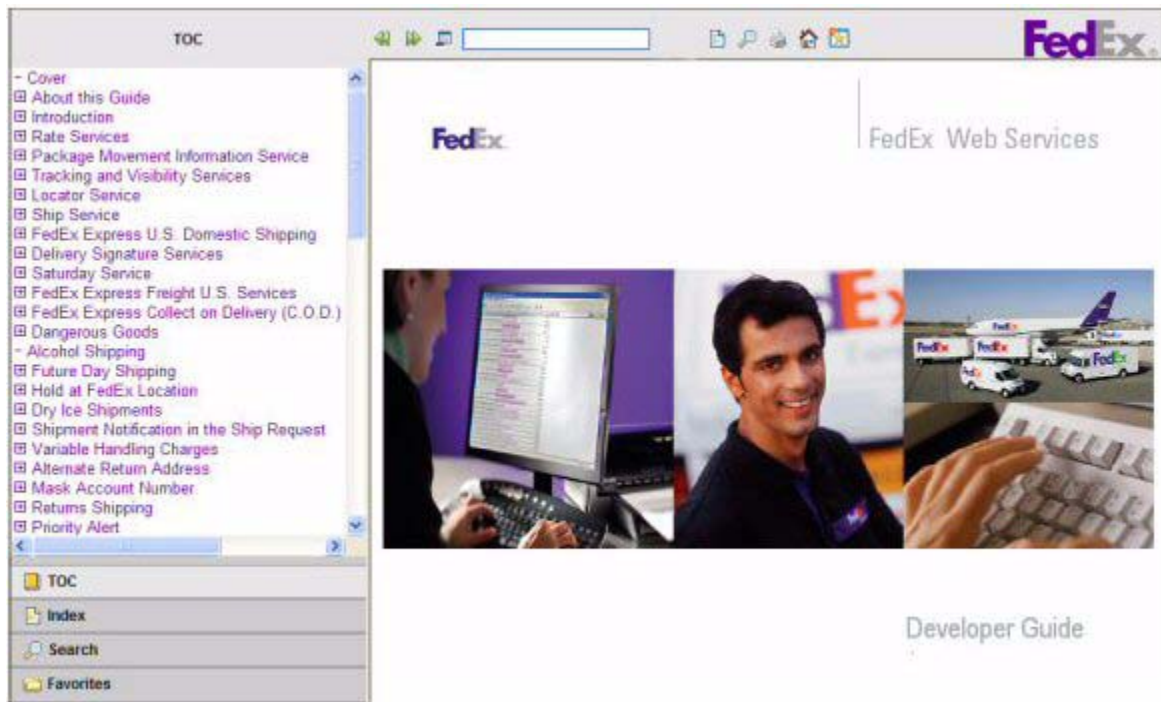

- Introduction (this chapter):
  - o Documentation overview and guidelines, including how to use the Help application and how to print this guide.
  - o Overview information about Web Services, including a high-level description of FedEx Web Services methods.
  - o Coding basics.
  - o Overview information about testing and certifying your application.
- Rate Service describes services to obtain rates for packages.

Each chapter covering FedEx Web Services coding includes:

- Service Details: Business rules for using the FedEx service.
- Service Options: Links to additional services that can be added to the basic Web Service.
- Coding Details: Best practices information, basic request and reply elements, and a link to error messages.
- XML Schema: A link to the layout for the service. This layout provides coding requirements for all elements in the schema.

## Using the Web Services Online Help

This guide is available as online help at the FedEx Developer Resource Center ([fedex.com/developer](http://fedex.com/developer)) in **Support > FedEx Web Services Developer Guide**.

Web Services Help opens in your default browser, such as Internet Explorer or Firefox. The first topic—in this case, the cover page—appears in the main window. The Table of Contents (TOC) appears in the navigation column. Under the TOC you can choose the Index, Search, or Favorites options. Each of these features appears in the same column.

The toolbar across the top of the window displays the following elements:

Back: Returns you to the previously viewed topic.

Forward: Goes to the next topic as listed in the TOC.

Quick Search: Enter a search term and click to highlight the term in the current topic. This feature only searches the current topic.

Hide Navigation: Hides the left navigation column.

Search: Opens the full search tool in the navigation column.

Print: Opens the **Print** dialog box.

Home: Opens the default topic: in this case, the cover page.

Add Topic to Favorites: Saves the current topic to your **Favorites** list.

## Printing This Guide or Online Help

You can print all or part of this guide from both the PDF and WebHelp versions.

### *Printing from the PDF Version*

From the PDF version you can print the complete document or a page range of the document.

Open the PDF file and click the printer icon  or click **File > Print**.

From the **Print** dialog box you can print the complete document, specify a page range, or choose from any of the available print options.

### *Printing from the WebHelp Version*

From the WebHelp version you can print a single topic or a page range of that topic.

Open WebHelp and click the printer icon .

From the **Print** dialog box you can print the complete topic or specify a page range.

## Web Services, WSDL, and SOAP Overview

This section describes the standard coding technologies used in FedEx Web Services.

### Web Services

Web Services is a collection of programming technologies, including XML, Web Services Description Language (WSDL), and SOAP, which allow you to build programming solutions for specific messaging and application integration.

Web Services are, by definition, platform independent. FedEx Web Services allow developers to build custom applications that are independent of changes to the FedEx interface. .

Note that FedEx Web Services are not offered as part of a Universal Description Discovery and Integration (UDDI) and must be downloaded from the FedEx Developer Resource Center ([fedex.com/developer](http://fedex.com/developer)) and stored locally for development and usage.

### WSDL

A SOAP request to, or response from, a service is generated according to the service's WSDL definition. A WSDL document describes a service. It is an XML document that provides information about what the service does, the methods that are available, their parameters, and parameter types. It describes how to communicate with the service in order to generate a request to, or decipher a response from, the service.

The purpose of a WSDL is to completely describe a Web Service to a client. A WSDL defines where the service is available and what communications protocol is used to talk to the service. It defines everything required to write a program to work with an XML Web Service. A WSDL document describes a Web Service using seven major elements. Elements can be abstract or concrete. Abstract XML elements describe the Web Service: <types>, <message>, <operation>, <portType>.

Concrete XML elements provide connection details: <service>, <port>, <binding>. .

Element	Definition								
<definitions>	The root element contains name space definitions.								
<portType>	The most important WSDL element. It is a set of all operations that a Web Service can accept and is a container for <operation> elements. This WSDL element describes a Web Service, the operations that can be performed, and the messages that are involved, and can be compared to a function library (or a module or a class) in a traditional programming language.								
<types>	Defines variable types used in the Web Service (both the parameters passed to a function and the type of the value passed back via the response). The data types are described by XML schema. This element contains user-defined data types (in the form of XML schema). The <types> element defines the data types that are used by the Web Service. For maximum platform neutrality, WSDL uses XML schema syntax to define data types.								
<message>	Defines the data elements of an operation. Each message can consist of one or more parts that can be compared to the parameters of a function call in a traditional programming language.								
<operation>	Child of the <binding> element that defines each operation that the port exposes. This element allows three messages only: <table border="1"> <thead> <tr> <th>Message</th><th>Definition</th></tr> </thead> <tbody> <tr> <td>Input Message</td><td>Data Web Services receives</td></tr> <tr> <td>Output Message</td><td>Data Web Services sends</td></tr> <tr> <td>Fault Message</td><td>Error messages from Web Services</td></tr> </tbody> </table>	Message	Definition	Input Message	Data Web Services receives	Output Message	Data Web Services sends	Fault Message	Error messages from Web Services
Message	Definition								
Input Message	Data Web Services receives								
Output Message	Data Web Services sends								
Fault Message	Error messages from Web Services								
<service>	The <service> element contains a <port> child element that describes the URL where the service is located. This is the location of the ultimate Web Service.								
<binding>	The <binding> element defines the message format and protocol details for each port. The binding element has two attributes: the name attribute and the type attribute. This element specifies how the client and the Web Service should send messages to one another.								

**Note:** For more information about the WSDL standard, refer to the World Wide Web Consortium (W3C) Website at [w3.org/TR/wsdl](http://w3.org/TR/wsdl).

## SOAP

SOAP is a simple XML-based protocol that allows applications to exchange information over HTTP. SOAP is built on open standards supported by numerous development tools on various platforms. SOAP provides a way to communicate between applications running on different operating systems, with different technologies and programming languages. The SOAP request interface is an object in your application programming language.

SOAP enables the data to pass through layers of intermediaries and arrive at the ultimate receiver the way it was intended. It is worth noting that you may not need to actually construct the SOAP messages yourself—many development tools available today construct SOAP behind the scenes.

## SOAP Message

A SOAP message is an ordinary XML document that can be a request for a Web Service from a client or a “reply” from a Web Service to a client.

- Required <SOAP:Envelope>
- Optional <SOAP:Header>
- Required <SOAP:EnvelopeBody>

### Example: Rate Request (SOAP Message)

```
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
  xmlns:v8="http://fedex.com/ws/rate/v8">
```

```
  <soapenv:Header/>
```

Optional     <SOAP:HeaderBody>

```
    <v8:RateRequest>
      <v8:WebAuthenticationDetail>
        <v8:CspCredential>
          <v8:Key>Provider Key</v8:Key>
          <v8:Password>Provider Password</v8:Password>
        </v8:CspCredential>
        <v8:UserCredential>
          <v8:Key>User Key</v8:Key>
          <v8:Password>User Password</v8:Password>
        </v8:UserCredential>
      </v8:WebAuthenticationDetail>
      <v8:ClientDetail>
        <v8:AccountNumber>XXXXXXXXXX</v8:AccountNumber>
        <v8:MeterNumber>XXXXXXXX</v8:MeterNumber>
        <v8:ClientProductId>ABCD</v8:ClientProductId>
        <v8:ClientProductVersion>1234</v8:ClientProductVersion>
      </v8:ClientDetail>
      <v8:TransactionDetail>
        <v8:CustomerTransactionId>Test v8 Rate Request</
v8:CustomerTransactionId>
      </v8:TransactionDetail>
      <v8:Version>
        <v8:ServiceId>crs</v8:ServiceId>
        <v8:Major>8</v8:Major>
        <v8:Intermediate>0</v8:Intermediate>
        <v8:Minor>0</v8:Minor>
      </v8:Version>
      <v8:ReturnTransitAndCommit>true</v8:ReturnTransitAndCommit>
      <v8:RequestedShipment>
        <v8:ShipTimestamp>2009-08-19T16:15:00-05:00</v8:ShipTimestamp>
        <v8:DropoffType>REGULAR_PICKUP</v8:DropoffType>
        <v8:PackagingType>YOUR_PACKAGING</v8:PackagingType>
        <v8:Shipper>
          <v8:Address>
            <v8:StreetLines>123 Maple Street</v8:StreetLines>
            <v8:City>Akron</v8:City>
            <v8:StateOrProvinceCode>OH</v8:StateOrProvinceCode>
            <v8:PostalCode>44333</v8:PostalCode>
```

```

        <v8:CountryCode>US</v8:CountryCode>
    </v8:Address>
</v8:Shipper>
<v8:Recipient>
    <v8:Address>
        <v8:StreetLines>123 Oak Street</v8:StreetLines>
        <v8:City>Collierville</v8:City>
        <v8:StateOrProvinceCode>TN</v8:StateOrProvinceCode>
        <v8:PostalCode>38017</v8:PostalCode>
        <v8:CountryCode>US</v8:CountryCode>
    </v8:Address>
</v8:Recipient>
<v8:RateRequestTypes>ACCOUNT</v8:RateRequestTypes>
<v8:PackageCount>2</v8:PackageCount>
<v8:PackageDetail>INDIVIDUAL_PACKAGES</v8:PackageDetail>
<v8:RequestedPackages>
    <v8:SequenceNumber>1</v8:SequenceNumber>
    <v8:InsuredValue>
        <v8:Currency>USD</v8:Currency>
        <v8:Amount>50.00</v8:Amount>
    </v8:InsuredValue>
    <v8:Weight>
        <v8:Units>LB</v8:Units>
        <v8:Value>20.0</v8:Value>
    </v8:Weight>
    <v8:Dimensions>
        <v8:Length>10</v8:Length>
        <v8:Width>10</v8:Width>
        <v8:Height>10</v8:Height>
        <v8:Units>IN</v8:Units>
    </v8:Dimensions>
    <v8:CustomerReferences>
        <v8:CustomerReferenceType>CUSTOMER_REFERENCE</
v8:CustomerReferenceType>
        <v8:Value>TEST v8 REQUEST</v8:Value>
    </v8:CustomerReferences>
</v8:RequestedPackages>
<v8:RequestedPackages>
    <v8:SequenceNumber>2</v8:SequenceNumber>
    <v8:InsuredValue>
        <v8:Currency>USD</v8:Currency>
        <v8:Amount>50.00</v8:Amount>
    </v8:InsuredValue>
    <v8:Weight>
        <v8:Units>LB</v8:Units>
        <v8:Value>10.0</v8:Value>
    </v8:Weight>
    <v8:Dimensions>
        <v8:Length>5</v8:Length>
        <v8:Width>5</v8:Width>
        <v8:Height>5</v8:Height>
        <v8:Units>IN</v8:Units>
    </v8:Dimensions>
</v8:RequestedPackages>

```

```

        </v8:RequestedShipment>
    </v8:RateRequest>
Required    <SOAP/soapenv:Body>
Required <SOAP/soapenv:BodyEnvelope>

```

### *Example: Delete Tag Request (SOAP Message)*

```

<SOAP-ENV:Envelope xmlns:SOAP-ENV="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:SOAP-ENC="http://schemas.xmlsoap.org/soap/encoding/" xmlns:xsi="http://
www.w3.org/2001/XMLSchema-instance" xmlns:xsd="http://www.w3.org/2001/
XMLSchema" xmlns="http://fedex.com/ws/ship/v8">
  <SOAP-ENV:Body>
    <DeleteTagRequest>
      <WebAuthenticationDetail>
        <UserCredential>
          <Key>xxxxxxxxxxxxxx</Key>
          <Password></Password>
        </UserCredential>
      </WebAuthenticationDetail>
      <ClientDetail>
        <AccountNumber>xxxxxxxx</AccountNumber>
        <MeterNumber>xxxxxx</MeterNumber>
      </ClientDetail>
      <TransactionDetail>
        <CustomerTransactionId>DE_Shakeout_wsvc</CustomerTransactionId>
      </TransactionDetail>
      <Version>
        <ServiceId>ship</ServiceId>
        <Major>8</Major>
        <Intermediate>0</Intermediate>
        <Minor>0</Minor>
      </Version>
      <DispatchLocationId>MQYA</DispatchLocationId>
      <DispatchDate>2008-10-08</DispatchDate>
      <Payment>
        <PaymentType>shipper</PaymentType>
        <Payor>
          <AccountNumber>xxxxxxxx</AccountNumber>
          <CountryCode>US</CountryCode>
        </Payor>
      </Payment>
      <ConfirmationNumber>997037200019454</ConfirmationNumber>
    </DeleteTagRequest>
  </SOAP-ENV:Body>
</SOAP-ENV:Envelope>

```

For more information about the SOAP standard, refer to the World Wide Web Consortium (W3C) Website at [w3.org/TR/SOAP](http://w3.org/TR/SOAP).

## Non-SOAP Web Services

FedEx offers a non-SOAP Web Services solution that you can use to send transactions without having to use tools that provide SOAP protocol support for Web Services. This may be convenient for developers using environments that do not provide support for SOAP. With this interface, XML documents are sent directly to the FedEx servers via the HTTP POST command. FedEx provides a set of specifications and examples to help with the development of this type of communications method.

To use the non-SOAP Web Service solution, you must have a working knowledge of HTTPS and Secure Socket Layering encryption, the ability to provide a secure SSL connection to FedEx and the ability to code to an operation interface using XML.

The interfaces used in the SOAP and non-SOAP Web Services are defined in WSDL files. The WSDL files contain schemas that define the layout of the operations. The same WSDL file is used for both the SOAP and non-SOAP Web Service users.

Non-SOAP users are concerned only with the schema definitions and not the other WSDL components that are SOAP-specific. The XML data that is sent via the non-SOAP interface looks almost identical to the data that is sent via the SOAP interface. The only difference is that the data sent via the non-SOAP interface does not contain the wrapping Envelope and Body tags that are specific to SOAP. An example of a request using the non-SOAP interface looks like this:

```
<ns:TrackRequest xmlns:ns="http://fedex.com/ws/track/v5" xmlns:xsi="http://
www.w3.org/2001/XMLSchema-instance" xsi:schemaLocation="http://fedex.com/ws/
track/v4 TrackService_v4.xsd ">
  <ns:WebAuthenticationDetail>
    <ns:UserCredential>
      <ns:Key>xxxxxxxxxxxxxxxx</ns:Key>
      <ns:Password>xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx</ns:Password>
    </ns:UserCredential>
  </ns:WebAuthenticationDetail>
  <ns:ClientDetail>
    <ns:AccountNumber>000000000</ns:AccountNumber>
    <ns:MeterNumber>0000000</ns:MeterNumber>
  </ns:ClientDetail>
  <ns:TransactionDetail>
    <ns:CustomerTransactionId>User Customizable Field</
ns:CustomerTransactionId></ns:TransactionDetail>
  <ns:Version>
    <ns:ServiceId>trck</ns:ServiceId>
    <ns:Major>4</ns:Major>
    <ns:Intermediate>0</ns:Intermediate>
    <ns:Minor>0</ns:Minor>
  </ns:Version>
  <ns:PackageIdentifier>
    <ns:Value>tttttttttttttt</ns:Value>
    <ns:Type>TRACKING_NUMBER_OR_DOORTAG</ns:Type>
  </ns:PackageIdentifier>
  <ns:IncludeDetailedScans>true</ns:IncludeDetailedScans>
</ns:TrackRequest>
```

## Error Handling

Error handling for non-SOAP operations is different from error handling for SOAP operations. The SOAP specification provides an error handling mechanism that is not present for non-SOAP operations. For a SOAP operation, a fault is returned as a SOAP exception. For a non-SOAP request, the contents of the SOAP fault are returned as an XML document. These SOAP fault documents are returned in situations such as schema validation failures or when operation types are unrecognized. In the following example, a SOAP fault document is returned from a schema validation failure in which the AccountNumber element was incorrectly sent as the AccountNumberx element:

```
<soapenv:Fault xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/">
  <faultcode>soapenv:Server</faultcode>
  <faultstring>5: Schema validation failed for request.</faultstring>
  <detail>
    <con:fault xmlns:con="http://www.bea.com/wli/sb/context">
      <con:errorCode>5</con:errorCode>
      <con:reason>Schema validation failed for request.</con:reason>
      <con:details>
        <con1:ValidationFailureDetail xmlns:con1="http://www.bea.com/wli/sb/stages/transform/config">
          <con1:message>Expected element 'AccountNumber@http://fedex.com/ws/ship/v8' instead of 'AccountNumberx@http://fedex.com/ws/ship/v8' here in element ClientDetail@http://fedex.com/ws/ship/v8</con1:message>
          <con1:xmlLocation>
            <ship:AccountNumberx xmlns:ship="http://fedex.com/ws/ship/v8">000000000</ship:AccountNumberx>
          </con1:xmlLocation>
          <con1:message>Expected element 'AccountNumber@http://fedex.com/ws/ship/v1' before the end of the content in element ClientDetail@http://fedex.com/ws/ship/v8</con1:message>
          <con1:xmlLocation>
            <ship:ClientDetail xmlns:ship="http://fedex.com/ws/ship/8">
              <ship:AccountNumberx>000000000000000000</ship:AccountNumberx>
              <ship:AccountNumberx>
              <ship:MeterNumber>0000000</ship:MeterNumber>
            </ship:ClientDetail>
          </con1:xmlLocation>
        </con1:ValidationFailureDetail>
      </con:details>
      <con:location>
        <con:node>Validate</con:node>
        <con:pipeline>Validate_request</con:pipeline>
        <con:stage>ValidateRequest</con:stage>
        <con:path>request-pipeline</con:path>
      </con:location>
    </con:fault>
  </detail>
</soapenv:Fault>
```

Each reply should be checked for the Fault element to indicate failure in processing the message. Note that the normal error processing still applies; this is an additional error check for incorrect syntax in XML documents.

Keep in mind that if you use either the SOAP or non-SOAP version of FedEx Web Services, labels are returned as Base64 encoded. To print shipping labels, you must decode labels before sending them to your printer. For more information on Base64 decoding, see [Creating a Label](#).

### ***Non-SOAP HTTP POST Example***

The following HTTPS POST example is a valid working example, but is not guaranteed to work for all programming languages, applications, and host systems:

```
POST /xml HTTP/1.0
Referer: YourCompanyNameGoesHere
Host: gatewaybetawsbeta.fedex.com
Port: 443
Accept: image/gif, image/jpeg, image/pjpeg, text/plain, text/html, */*
Content-Type: image/gif
Content-length: %d
Your FedEx Transaction
```

Each line is followed by one new line character except Content-length and the FedEx transaction. Two new line characters follow the Content-length line. The FedEx transaction has no extra characters. The Content-length line should have the length of the FedEx transaction in place of the %d variable.

**Note:** Port 443 must be opened for bi-directional communication on your firewall.

After formatting your non-SOAP transaction and placing it in a HTTP POST request, you will need to open an SSL connection to the FedEx test server and send the request through FedEx by using your SSL connection.

Next, parse the HTTPS response to determine if there were any errors. Examine the HTTP header to determine if any HTTP or Web Server errors were encountered. If you received a 200 status code, parse the reply to determine if there were any processing problems.

## **Visual Basic Project Error**

You may receive an error indicating that an element is not set, even after setting it in the code. When you set a Boolean type element to true, you may also need to set the specified element to true.

## **Implementing FedEx Web Services**

Before you begin your implementation of FedEx Web Services, make note of the following guidelines:

- FedEx Web Services is designed for use by skilled developers who are familiar with the communication standards SOAP and Web Services Description Language (WSDL).
- Unlike traditional client/server models, such as a Web server or Web page system, Web Services do not provide the user with a GUI. Instead, Web Services share business logic, data, and processes through a programmatic interface across a network. .
- To perform a particular FedEx task such as tracking a package, you need to use a class, module, or function that creates your request, sends it to the FedEx platform, and handles the response. .

- Web Services are designed to support any operating system and coding language. Downloadable sample code is available in Java, C#, VB, .Net, and PHP languages from the FedEx Developer Resource Center Technical Resources.
- Transactions submitted to FedEx using FedEx Web Services are required to have a minimum of 128-bit encryption to complete the request.

## Understanding the XML Schema

The XML schema defines the messages that you can use to access the FedEx Services. You create a request that contains business data and other instructions and you send it to FedEx. FedEx replies with a response that contains the data resulting from the instructions you sent in. Notice that schema diagrams are conveniently linked to help you find information and child values.

The XML schema provides a means for defining the structure, content, and semantics of XML documents.

An XML schema defines:

- Elements and attributes that can appear in a document
- Elements that are child elements
- Order and number of child elements
- Whether an element is empty or can include text
- Data types, default values, and fixed values for elements and attributes

Some important facts about the XML schema:

- Elements that contain sub-elements or carry attributes have complex types. .
- Elements that contain numbers (and strings, and dates, etc.), but do not contain any sub-elements, have simple types. Some elements have attributes. Attributes always have simple types.
- Complex types in the instance document, and some of the simple types, are defined in the schema associated with a FedEx Web Service. Other simple types are defined as part of XML schema's repertoire of built-in simple types. .
- XML schema built-in simple types are prefixed by `""xs:""`, which is associated with the XML schema namespace through the declaration `xmlns:xs=""http://www.w3.org/2001/XMLSchema"`, displayed in the schema element.
- The same prefix, and the same association, are also part of the names of built-in simple types, e.g., . `xs:string`. This association identifies the elements and simple types as belonging to the vocabulary of the XML schema language, rather than the vocabulary of the schema author.

## Guide to the XML Schema

The XML schema for each WSDL provides details about the structure, content, and semantics of the request XML document sent to a FedEx Web Service and the XML document returned by that FedEx Web Service.

The top of each service schema includes:

- Schema location and schema file name that ends in an ".xsd" suffix.
- Alphabetical listing of complex types for the documented service.
- Alphabetical listing of schema simple types for the documented service.
- Input or request data type for the documented service.
- Output or reply data type for the documented service.

The remainder of the service schema contains tables of information about each element, complex type, and simple type. .

Each table consists of some or all of the following sections: diagram, namespace, children, type, properties, used by, facets, and source.

## XML Schema Diagrams

XML schema diagrams describe the elements (usually associated with a request or reply), complex types, and simple types that make up the WSDL. The following table illustrates the relationships and behavior of elements and types.

Diagram	Description
	<p>Diagrams of a parent element, such as AddressValidationRequest, include connections to the child elements. Child elements can be simple or complex types.</p> <p>A child element connected with a solid line and surrounded by a box with a solid border represents a required type, such as ClientDetail.</p> <p>A child element connected by a dotted line and surrounded by a dotted border represents an optional type (minOccurs="0"), such as TransactionDetail.</p> <p><b>Note:</b> An element that is defined as minOccurs="0" may be required for some calls.</p> <p>Types that are documented include the documentation directly below the box.</p> <p>All children are linked by name below the diagram.</p>
	<p>A box with a single solid border represents a single element that is required.</p> <p>The type can be simple or complex.</p>

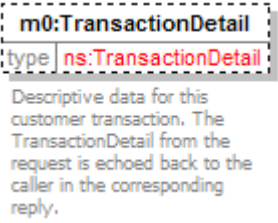

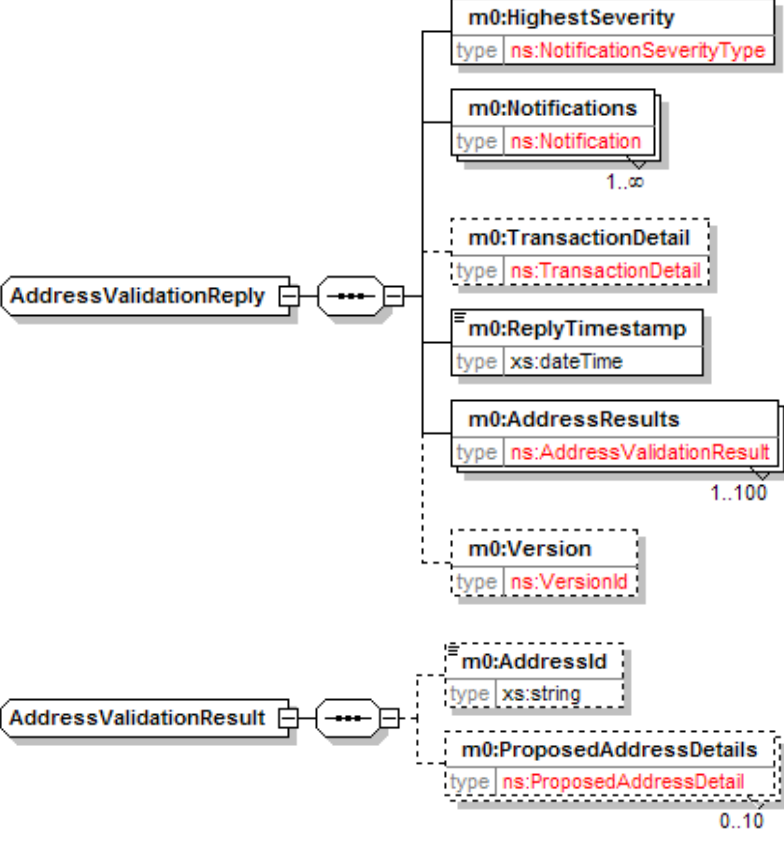

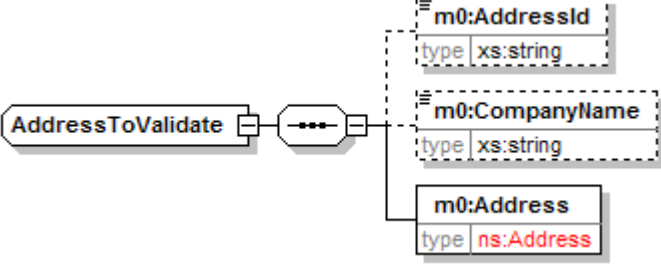

Diagram	Description
 <p><b>m0:TransactionDetail</b> type ns:TransactionDetail</p> <p>Descriptive data for this customer transaction. The TransactionDetail from the request is echoed back to the caller in the corresponding reply.</p>	<p>A box with a dotted border indicates a single element that is optional.</p> <p>The type can be simple or complex.</p>
 <p>The diagram shows two elements: <b>AddressValidationReply</b> and <b>AddressValidationResult</b>. <b>AddressValidationReply</b> contains a sequence of elements: <b>m0:HighestSeverity</b> (type ns:NotificationSeverityType), <b>m0:Notifications</b> (type ns:Notification, 1..∞), <b>m0:TransactionDetail</b> (type ns:TransactionDetail), <b>m0:ReplyTimestamp</b> (type xs:dateTime), <b>m0:AddressResults</b> (type ns:AddressValidationResult, 1..100), and <b>m0:Version</b> (type ns:VersionId). <b>AddressValidationResult</b> contains a sequence of elements: <b>m0:AddressId</b> (type xs:string) and <b>m0:ProposedAddressDetails</b> (type ns:ProposedAddressDetail, 0..10).</p>	<p>A layered box represents a multiple occurrence element. A solid line represents a required multiple occurrence element.</p> <p>The number of possible occurrences appears below the box, as depicted by the AddressResults element.</p> <p>An unbounded number of occurrences is represented by the infinity <math>\infty</math> symbol (maxOccurs="unbounded"), as depicted by the Notifications type.</p> <p>A layered box with a dotted border represents an optional multiple occurrence type (minOccurs="0"), such as ProposedAddressResults.</p> <p><b>Note:</b> An element that is defined as minOccurs="0" may be required for some calls.</p>
 <p>The diagram shows the <b>AddressToValidate</b> element containing a sequence of elements: <b>m0:AddressId</b> (type xs:string), <b>m0:CompanyName</b> (type xs:string), and <b>m0:Address</b> (type ns:Address).</p>	<p>A standard type such as "string" appears in black text below element name.</p> <p>A FedEx-specific type such as "Address" appears in red text below the element name.</p>

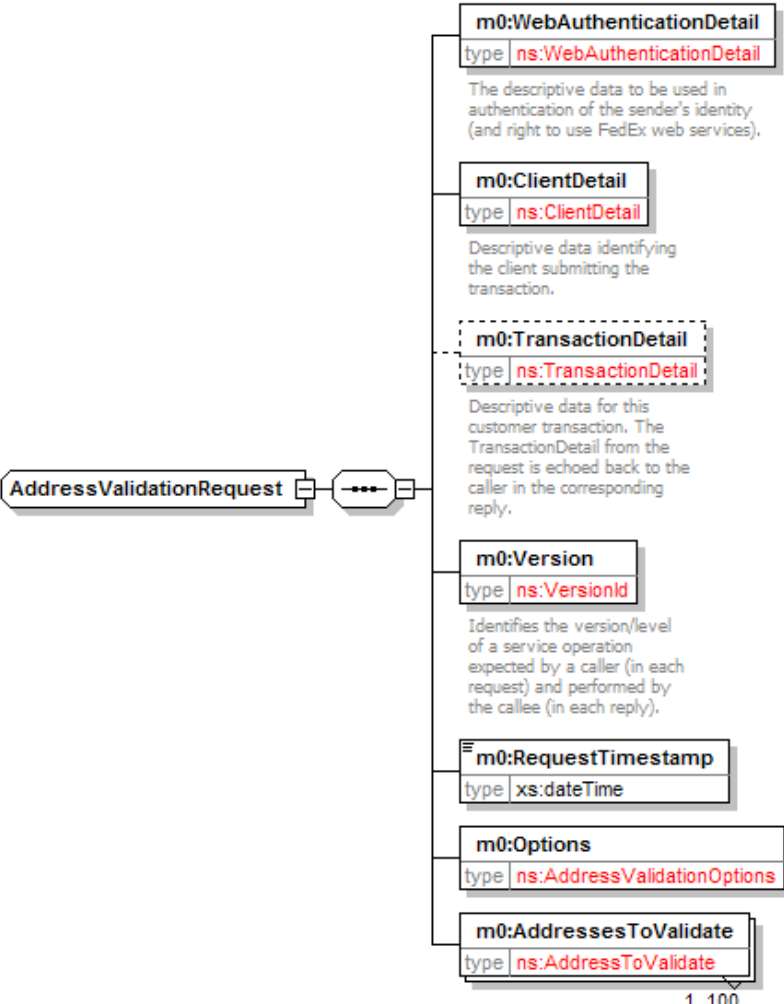

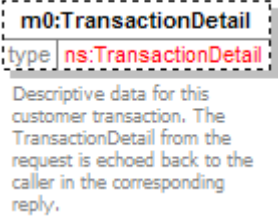

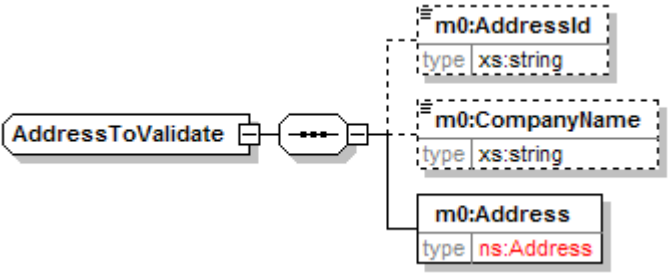

Diagram	Description
 <p>The diagram shows the structure of the <b>AddressValidationRequest</b> element. It is a container element with a solid border and a dashed line connecting it to its children. The children are listed below the diagram:</p> <ul style="list-style-type: none"> <li><b>m0:WebAuthenticationDetail</b> (type <b>ns:WebAuthenticationDetail</b>): The descriptive data to be used in authentication of the sender's identity (and right to use FedEx web services).</li> <li><b>m0:ClientDetail</b> (type <b>ns:ClientDetail</b>): Descriptive data identifying the client submitting the transaction.</li> <li><b>m0:TransactionDetail</b> (type <b>ns:TransactionDetail</b>): Descriptive data for this customer transaction. The TransactionDetail from the request is echoed back to the caller in the corresponding reply.</li> <li><b>m0:Version</b> (type <b>ns:VersionId</b>): Identifies the version/level of a service operation expected by a caller (in each request) and performed by the callee (in each reply).</li> <li><b>m0:RequestTimestamp</b> (type <b>xs:dateTime</b>): Identifies the version/level of a service operation expected by a caller (in each request) and performed by the callee (in each reply).</li> <li><b>m0:Options</b> (type <b>ns:AddressValidationOptions</b>): Identifies the version/level of a service operation expected by a caller (in each request) and performed by the callee (in each reply).</li> <li><b>m0:AddressesToValidate</b> (type <b>ns:AddressToValidate</b>): Identifies the version/level of a service operation expected by a caller (in each request) and performed by the callee (in each reply).</li> </ul> <p>1..100</p> <p>children: <a href="#">m0:WebAuthenticationDetail</a> <a href="#">m0:ClientDetail</a> <a href="#">m0:TransactionDetail</a> <a href="#">m0:Version</a> <a href="#">m0:RequestTimestamp</a> <a href="#">m0:Options</a> <a href="#">m0:AddressesToValidate</a></p>	<p>Diagrams of a parent element, such as <b>AddressValidationRequest</b>, include connections to the child elements. Child elements can be simple or complex types.</p> <p>A child element connected with a solid line and surrounded by a box with a solid border represents a required type, such as <b>ClientDetail</b>.</p> <p>A child element connected by a dotted line and surrounded by a dotted border represents an optional type (<b>minOccurs="0"</b>), such as <b>TransactionDetail</b>.</p> <p><b>Note:</b> An element that is defined as <b>minOccurs="0"</b> may be required for some calls.</p> <p>Types that are documented include the documentation directly below the box.</p> <p>All children are linked by name below the diagram.</p>
<p><b>m0:Version</b> type <b>ns:VersionId</b></p> <p>Identifies the version/level of a service operation expected by a caller (in each request) and performed by the callee (in each reply).</p>	<p>A box with a single solid border represents a single element that is required.</p> <p>The type can be simple or complex.</p>

Diagram	Description
 <p><b>m0:TransactionDetail</b> type ns:TransactionDetail</p> <p>Descriptive data for this customer transaction. The TransactionDetail from the request is echoed back to the caller in the corresponding reply.</p>	<p>A box with a dotted border indicates a single element that is optional.</p> <p>The type can be simple or complex.</p>
 <p><b>AddressValidationReply</b> (required multiple occurrence)</p> <ul style="list-style-type: none"> <li><b>m0:HighestSeverity</b> (required single occurrence) type ns:NotificationSeverityType</li> <li><b>m0:Notifications</b> (required multiple occurrence) type ns:Notification 1..∞</li> <li><b>m0:TransactionDetail</b> (optional single occurrence) type ns:TransactionDetail</li> <li><b>m0:ReplyTimestamp</b> (required single occurrence) type xs:dateTime</li> <li><b>m0:AddressResults</b> (required multiple occurrence) type ns:AddressValidationResult 1..100</li> <li><b>m0:Version</b> (optional single occurrence) type ns:VersionId</li> </ul> <p><b>AddressValidationResult</b> (required multiple occurrence)</p> <ul style="list-style-type: none"> <li><b>m0:AddressId</b> (required single occurrence) type xs:string</li> <li><b>m0:ProposedAddressDetails</b> (optional multiple occurrence) type ns:ProposedAddressDetail 0..10</li> </ul>	<p>A layered box represents a multiple occurrence element. A solid line represents a required multiple occurrence element.</p> <p>The number of possible occurrences appears below the box, as depicted by the AddressResults element.</p> <p>An unbounded number of occurrences is represented by the infinity ∞ symbol (maxOccurs="unbounded"), as depicted by the Notifications type.</p> <p>A layered box with a dotted border represents an optional multiple occurrence type (minOccurs="0"), such as ProposedAddressResults.</p> <p><b>Note:</b> An element that is defined as minOccurs="0" may be required for some calls.</p>
 <p><b>AddressToValidate</b> (required multiple occurrence)</p> <ul style="list-style-type: none"> <li><b>m0:AddressId</b> (required single occurrence) type xs:string</li> <li><b>m0:CompanyName</b> (required single occurrence) type xs:string</li> <li><b>m0:Address</b> (required single occurrence) type ns:Address</li> </ul>	<p>A standard type such as "string" appears in black text below element name.</p> <p>A FedEx specific type such as "Address" appears in red text below the element name.</p>

## Required Elements

Most requests to FedEx require the following complex elements:

**Note:** These elements are common to most Web Services (see the following table for which WSDLs need which common elements) and are not documented service by service.

**WebAuthenticationDetail:** The WebAuthenticationDetail element includes user credentials issued by FedEx so that your transactions are recognized by the FedEx back-end systems. The following elements are required:

Element	Description
WebAuthenticationDetail	The descriptive data to be used in authentication of the shipper's identity and right to use FedEx Web Services.
UserCredential	Credential used to authenticate a specific software application. This value is provided by FedEx after registration.
WebAuthenticationCredential	Two-part authentication string used to verify shipper identity.
WebAuthenticationCredential/Key	Unique identifier assigned to each customer as part of their authentication credentials.
WebAuthenticationCredential/Password	Second part of the authentication credential which has a direct relationship with the credential key.

**Note:** Web Services now use two-factor authentication. If you do not have new credentials, the latest WSDLs will use your old authentication credentials. If you do not have a new user authentication credential, do not populate the password element.

**ClientDetail:** The ClientDetail element is required for all services that need your FedEx account number and meter number. Requirements are:

Element	Description
ClientDetail/AccountNumber	Required. Your FedEx account number.
ClientDetail/MeterNumber	Maximum of 9 characters. The associated meter number for your FedEx account number.

- A standard type such as “string” appears in black text below element name.
- A FedEx specific type such as “Address” appears in red text below the element name.

**Note:** When building a Web-based application for shipping that will be used at multiple locations, include the local FedEx Express® account and meter in the ClientDetail section of the ship transaction. Create a database to hold multiple account and meter numbers for the shipping locations.

**TransactionDetail:** The TransactionDetail element is optional for all transactions. However, if you want to identify associated request and reply transactions, use this element.

Element	Description
TransactionDetail/CustomerTransactionId	Maximum of 40 characters. This element allows you to assign a unique identifier to your transaction. This element is returned in the reply and helps you match requests to replies.

**VersionId:** The VersionId element is required and uploads the WSDL version number to FedEx. FedEx provides the latest version number for the service you are using. This number should be updated when you implement a new version of the service.

Element	Description
ServiceId	Identifies a system or sub-system which performs an operation.
Major	Identifies the service business level.
Intermediate	Identifies the service interface level.
Minor	Identifies the service code level.

**Shipper Information:** Your shipper information is required for all shipping transactions: :

Element	Description
AccountNumber	If you include this element in the ship request, this entry overrides the account number in the ClientDetail element.
TIN	Tax Identification Number— — this information is required for international shipments only.
Contact	The Contact element includes: <ul style="list-style-type: none"> <li>• PersonName</li> <li>• Title</li> <li>• CompanyName</li> <li>• Department</li> <li>• PhoneNumber</li> <li>• PagerNumber</li> <li>• FaxNumber</li> <li>• e-mailAddressEmailAddress</li> </ul>
Address	This element includes: <ul style="list-style-type: none"> <li>• StreetLines: two StreetLines elements are allowed.</li> <li>• City</li> <li>• StateOrProvinceCode: required if your shipper address is in the U.S. or Canada.</li> <li>• PostalCode: required.</li> <li>• UrbanizationCode: may be required if your shipper address is in Puerto Rico.</li> <li>• CountryCode: required.</li> </ul>
Residential	Required if your shipper address is considered a residential location. If you are unsure, use the Address Validation Service to check your address.

### ***Reply Notifications***

Notifications are returned in replies. The notification element provides the notification ranked according to their severity:

- **HighestSeverity:** This element ranks the level of notification severity. Values include:
- **FAILURE:** Code/message explains that your request could not be handled at this time; do not resubmit right now.

- **ERROR:** Code/message identifies a problem with your request data; you may fix the request data and try again.
- **WARNING:** Your request was successful. However, the code/message explains what had to be done to fulfill your request; you may need to determine whether that is what you intended, you may need to do this differently next time, or you may need to prepare for a future change. Request was completed.
- **NOTE:** Your request was successful. However, the code/message contains additional information about how your request was fulfilled; you do not need to take any special action.
- **SUCCESS:** Your request was successful. There are no NOTE or WARNING notifications.

**Note:** There is a possibility of multiple Notification objects (different severity levels) for a single request. The response notification severity values of ERROR, FAILURE, and SUCCESS severity should never be combined in a single response.

### *Notification Examples*

For example, if you need to perform a U.S. address correction, the service should accept a (U.S.) Address object from its client and return that Address in a standardized form (canonical spelling and abbreviation of street name parts, elimination of redundant white space, data correction where possible, etc.). The following cases illustrate several notification types.

The example service has been assigned a NotificationSourceType value of "USACS".

Case	Reply
Request to submit an Address that is valid and is already in standardized form (i.e., there is nothing to say except "OK").	Notifications: SUCCESS and Address: the original address (or copy).
Request to submit an Address that is valid but not in standardized form (e.g., the word "Boulevard" in a street name is replaced with the standard abbreviation "Blvd" and "Saint Louis" as a city name is replaced with "St Louis").	Notifications: NOTE, "Standard abbreviation applied to street name"}, {NOTE, "Standard abbreviation applied to city name"} and Address: the original address, with modification made to the street name and city name.
Request to submit an Address that is valid but with only a 5-digit postal code: the service supplies the ZIP+4 for the standardized address.	Notifications: NOTE, "ZIP+4 suffix added"} and Address: the original address, with the four-digit suffix added to the postal code.
Request to submit an Address that is identifiable by street data, city name, and state code, but with a 5-digit postal code that does not match the other fields. The service supplies the correct ZIP+4 for the standardized address.	Notifications: WARNING, "ZIP code corrected to match rest of address"} and Address: the original address, with the replacement postal code.

Case	Reply
Request to submit an Address that has an incorrect state code. The original address contains a ZIP+4 postal code belonging to a city/state pair that matches the client's original city and street address. The service supplies the corresponding state code in the corrected address.	Notifications: WARNING, "State code corrected to match city and ZIP code"} and Address: the original address, with the revised state code.
Request to submit an Address that has an incorrect state code. The original address contains a ZIP+4 postal code belonging to a city/state pair that matches the client's original city and street address. The service rejects the client's address.	Notifications: ERROR, "State code is incorrect for city/ZIP combination"} and Address: empty (either all fields blank or no Address at all).
Request to submit an Address that contains only a single street line (no city, state, or postal code). The service rejects the request.	Notifications: {ERROR, "City name is missing and cannot be corrected"}, {ERROR, "State code is missing and cannot be corrected"}, {ERROR, "ZIP code is missing and cannot be corrected"} and Address: empty (either all fields blank or no Address at all)
Request to submit an Address, but the address correction service's database server is down or fails.	Notifications: {FAILURE, "Service temporarily unavailable"}, Address: empty (either all fields blank or no Address at all).

## Implementation Process

Planning your integration and organizing your application data to address your shipping needs can sometimes take more time than the actual implementation of the integration. FedEx Web Services conforms to industry standards and is compatible with a comprehensive array of developer's tools. This ensures the fastest time-to-market with maximum flexibility to integrate FedEx transactions and information into your applications. FedEx WSDLs are fully interoperable with any product or developer's tool that also conforms to the WS-I Basic Profile. For details, see [ws-i.org/Profiles/BasicProfile-1.1-2004-08-24.html](http://ws-i.org/Profiles/BasicProfile-1.1-2004-08-24.html).

To obtain FedEx Web Services and begin integrating with an application, you will need to access documentation, sample code, and sample service requests and replies with the WSDLs from the FedEx Developer Resource Center Technical Resources. You will also need to obtain a test meter number to engage in real-time online testing in the FedEx- hosted test environment. . Note that not all services are available outside the U.S.

## Testing

FedEx supplies a complete online operating environment with which to test your applications against live FedEx servers. In order to execute test interactions, you must first include a test account number, test meter number, authentication key, and password in your code. These credentials are provided to registered developers.

## Certification

Certification is the process of ensuring that your implementation meets a number of requirements for safe, secure, and effective operation of your solution in the FedEx production environment. Certification requirements differ based on whether you are a corporate or commercial developer, and whether you are implementing using the advanced or standard services.

## Go to Production

Once an application has passed certification, the developer must replace the test credentials with the production credentials issued by FedEx. The application connection is then directed to the production servers, and the application is live.

Once an application has completed the above mentioned process and requirements, FedEx will enable the provider's CSP credentials for processing all applicable services in the production environment. The URL needed to direct the CSP application to the FedEx production servers will also be provided. The provider would then need to obtain production User Credentials (Register CSP User Service) and a production meter number (Subscribe Service). Once this information has been obtained with the connection directed to the production servers, the provider's application is considered live.

### ***Requirements for Corporate and Non-Commercial Developers***

There are some differences in how support is provided and in the approvals required to go into production that depend on whether you are creating an application for use by your own company or you are planning to resell your solution to others.

### ***Requirements and Resources for Corporate Developers***

Corporate developers are typically part of a dedicated development team at a single company. This category also includes third-party developers (consultants) hired by the company to work on its behalf. In all cases, the integration will be used by the company itself and will not be resold or distributed outside of its own footprint. In this situation, FedEx can support the customer directly. .

<b>Requirements and Resources for Corporate Developers</b>	
Must be accepted into the FedEx <sup>®</sup> Compatible Solutions Program (CSP)	No
Self-certification of implementations using standard services	Yes
Self-certification of implementations using advanced services	No
Certification Assistance	Yes (WISC team)
FedEx supports the customer directly	Yes

### *Preproduction Assistance*

Preproduction assistance is available via the FedEx Web Integrated Solutions Consultation (WISC) Team. If you are in the preproduction stages of implementing a FedEx Web Integrated Solution and would like to speak with a FedEx Integration Consultant who can assist you in understanding FedEx Web Services, contact your FedEx sales executive or technical support at 1.877.339.2774 Monday through Friday, 7 a.m. to 9 p.m. (CST), and Saturday 9 a.m. to 3 p.m.

(CST). Both your FedEx sales executive and technical support can request a WISC Team member to contact you within 3 business days.

Corporate developers may find that solutions to their needs have already been implemented by a software vendor that is part of the FedEx Compatible Solutions Program. If improved time-to-market, cost containment, or specialized knowledge is needed, corporate development planners may want to review the available third-party solutions. To see a list of the solutions provided by the CSP providers, go to the Available CSP Solutions page at [fedex.allegis.com/LeadReg.asp](http://fedex.allegis.com/LeadReg.asp).

### *Requirements for Consultants*

Consultants developing on behalf of a corporate customer must ensure that their client provides their account information and a signed End User License Agreement to FedEx in order to obtain a production test meter.

### **Requirements and Resources for Commercial Developers**

Commercial developers create solutions with the intent of distributing and/or reselling them to their customers. Because they are deployed in a variety of situations, commercial integrations generally require a higher order of “fit and finish.” Commercial developers are responsible for supporting their products for their customers. FedEx has a dedicated team of professionals to help developers commercialize their products and to coordinate the three-way interplay between the developer, the end customer, and FedEx. .

<b>Requirements and Resources for Commercial Developers</b>	
Must be accepted into the FedEx Compatible Solutions Program (CSP)	Yes (Required)
Self-certification of implementation using Standard Services	No
Self-certification of implementations using Advanced Services	No
Certification Assistance	Yes (via CSP)
FedEx supports the customer directly	No
FedEx supports the commercial developer's customer	Indirectly

If you are a commercial developer interested in becoming a FedEx Compatible Solutions Provider, visit [fedex.com/us/compatiblesolutions/provider/](http://fedex.com/us/compatiblesolutions/provider/) for more information about the FedEx Compatible Solutions Program (CSP).

### **URL Errors**

If a VB.NET or C# project still sends transactions to the test server after changing the URL in the WSDLs to point to production, perform the following:

- Make sure permissions are already activated in the production environment.
- Copy the WSDL files to a different folder.
- Follow the directions on changing the new WSDL files to point to production as described in the FedEx Developer Resource Center in the Move to Production topic.
- Remove existing Web Services references from your project that point to old WSDLs containing the URLs to the test environment.

- Create new Web references that point to the modified WSDLs. Use the same names as the old references.
- Compile and test the project. Your new production credentials should work for Standard Web Services, such as rating or tracking without extra permissions. Advanced Web Services require permissions to be active before they will work. Old test key values will now return an error message.

# Rate Services

Use the RateService WSDL to request pre-ship rating information and to determine estimated or courtesy billing quotes. Time in Transit can be returned with the rates if it is specified in the request. Depending on how a rate request is structured, the reply will return in different structures. These structures have two different names.

## Rate

RateRequest provides a rate response on a single service.

**Note:** A rate request does not return route or service availability. All rate quotes are estimates only and may differ from the actual invoiced amount.

## Rate Available Services/Rate Shopping

A Rate Available Services request will provide a list of available services from one request. Rates are returned for each service on the list.

**Note:** A Rate Available Services request does not return route information, but does check service availability and returns only those services that are actually available.

## Rate Service Details

The Rate and Rate Available Services operations provide a shipping rate quote for a specific service combination depending on the origin and destination information supplied in the request. The following details apply:

- Discount rates are available for all services and origin/destination pairs.
- Time in transit may be returned with the rates if it is specified in the request.
- The Rate operation returns the rate for the origin and destination by requested service. You will not receive service checking to validate whether that service is actually available for your ship date and origin/destination pair.
- The Rate Available Services operation returns the rate for the origin and destination for the requested service. Note that only valid services are returned.
- Rate and Rate Available Services for FedEx Express shipments support intra-Mexico shipping.
- Rating is available for FedEx SmartPost Shipping. See FedEx SmartPost Shipping, subsection FedEx SmartPost Request Elements for more details.
- This quote is an estimate and may differ from the actual invoiced amount.
- Rate shopping, service-specific commitment and rate information may also be specified.

For more detailed information about the services offered by FedEx, see the electronic [FedEx Service Guide](#).

## Rate Coding Details

When requesting a rate quote:

- Include as much detail as possible about your shipment. The RateService WSDL provides elements to identify your shipment, including shipping option elements. This information is important for calculating the correct shipping costs with surcharges.
- Use the optional RateRequestTypes element to have list rates returned with discount rates. If you choose LIST as the element value, you receive both discount and list rates, in addition to automation rate quotes.
- For Rate (a single service), specify the service to ensure rate data for the service and shipment data input is returned. For Rate Available Services (multiple services returned), do not include the ServiceType. The system will then return a list of services.
- For Rate, specify the carrier by using CarrierCode. For Rate Available Services, specify the carrier to ensure rate data for all services for the carrier and the shipment data combination are returned, or do not specify a CarrierCode to receive all available services from all carriers in the return.
- Use the optional ReturnTransitAndCommit element to include transit time information in the reply. FedEx Express information will include the day and date the package will be delivered, based on the ship date you specified. The FedEx Ground response will describe the number of business days required for the package delivery.

**RateRequest Elements**

Element	Required	Description
Shipper	Required	The descriptive data for the physical location from which the shipment originates.
Recipient	Required	The descriptive data for the physical location to which the shipment is destined.
CustomsValue	Optional	Used to calculate Argentina and Dominican Republic export taxes.
DocumentContent	Optional	Used to calculate taxes for Jamaica and United Arab Emirates.
CurrencyType	Optional	Identifies the preferred currency of the requestor.
Payment	Optional	Descriptive data indicating the method and means of payment to FedEx for providing shipping services.
VariableHandlingChargeDetail	Optional	Details about how to calculate variable handling charges at the shipment level.
DropoffType	Optional	Identifies the method by which the package is to be tendered to FedEx. This element does not dispatch a courier for package pickup.
ServiceType	Optional	Identifies the FedEx service to use in shipping the package for a rate request. <b>Note:</b> Do not include this element for Rate Available Services requests.
PackagingType	Required	Identifies the packaging used by the requestor for the package. See PackagingType for list of valid enumerated values.
ShipTimestamp	Optional	The date format must be YYYY-MM-DDTHH:MM:SS-xx:xx. The time must be in the format: HH:MM:SS using a 24-hour clock. The date and time are separated by the letter T (e.g., 2009-06-26T17:00:00). The UTC offset indicates the number of hours/minutes (e.g., xx:xx) from UTC (e.g 2009-06-26T17:00:00-04:00 is defined as June 26, 2009 5:00 p.m. Eastern Time).

Element	Required	Description
SpecialServicesRequested	Optional	<p>Identifies the collection of special services requested by the shipper and offered by FedEx.</p> <p>If the shipper requests a special service that requires additional data (such as C.O.D.), the special service type must be present in the SpecialServiceTypes collection, and the supporting detail must be provided in the appropriate sub-object (such as CodDetail).</p> <p>Valid values are:</p> <ul style="list-style-type: none"> <li>• BROKER_SELECT_OPTION</li> <li>• COD</li> <li>• DRY_ICE</li> <li>• EAST_COAST_SPECIAL</li> <li>• ELECTRONIC_TRADE_DOCUMENTS</li> <li>• EMAIL_NOTIFICATION</li> <li>• FUTURE_DAY_SHIPMENT</li> <li>• HOLD_AT_LOCATION</li> <li>• HOME_DELIVERY_PREMIUM</li> <li>• INSIDE_DELIVERY</li> <li>• INSIDE_PICKUP</li> <li>• PENDING_SHIPMENT</li> <li>• RETURN_SHIPMENT</li> <li>• SATURDAY_DELIVERY</li> <li>• SATURDAY_PICKUP</li> <li>• DANGEROUS_GOODS</li> <li>• EXTREME_LENGTH</li> <li>• FLATBED_TRAILER</li> <li>• FREIGHT_GUARANTEE</li> <li>• LIFTGATE_DELIVERY</li> <li>• LIFTGATE_PICKUP</li> <li>• LIMITED_ACCESS_DELIVERY</li> <li>• LIMITED_ACCESS_PICKUP</li> <li>• PRE_DELIVERY_NOTIFICATION</li> <li>• PROTECTION_FROM_FREEZING</li> <li>• REGIONAL_MALL_DELIVERY</li> <li>• REGIONAL_MALL_PICKUP</li> <li>• EXHIBITION_DELIVERY</li> <li>• EXHIBITION_PICKUP</li> <li>• CALL_BEFORE_DELIVERY</li> <li>• CUSTOM_DELIVERY_WINDOW</li> <li>• DO_NOT_BREAK_DOWN_PALLETS</li> <li>• DO_NOT_STACK_PALLETS</li> <li>• EXTREME_LENGTH</li> <li>• FOOD</li> <li>• FREIGHT_GUARANTEE</li> <li>• INSIDE_PICKUP</li> </ul>

Element	Required	Description
SpecialServicesRequested (Continued)	Optional	<ul style="list-style-type: none"> <li>• LIFTGATE_DELIVERY</li> <li>• LIFTGATE_PICKUP</li> <li>• LIMITED_ACCESS_PICKUP</li> <li>• POISON</li> <li>• PROTECTION_FROM_FREEZING</li> <li>• TOP_LOAD</li> </ul>
ReturnTransitAndCommit	Optional	Request that transit time information be included in the reply.
RateRequestTypes	Optional	<p>Indicates the type of rates to be returned. Valid values are:</p> <ul style="list-style-type: none"> <li>• ACCOUNT</li> <li>• LIST</li> <li>• MULTIWEIGHT</li> </ul> <p><b>Note:</b> RateRequest automatically returns discount rates. If you include the LIST option, the RateRequest returns both list and discount rates.</p>
RequestedPackageDetailType	Optional	<p>Specify the package detail type. Valid values are:</p> <ul style="list-style-type: none"> <li>• INDIVIDUAL_PACKAGES: Specify details about a single piece shipment rate request. Currently, only one occurrence is supported.</li> <li>• PACKAGE_SUMMARY: Specify details about a multiple-package shipment (MPS) rate request. Use this to rate a total piece and total weight shipment.</li> <li>• PACKAGE_GROUPS: Specify details about a group of packages and the total number of packages in the entire shipment. The maximum number of packages in one rate request is 200.</li> </ul>
PackageCount	Optional	The total number of packages in the entire shipment. The maximum number of packages in one rate request is 200.
ServiceOptionType	Optional	Specify if Saturday delivery is required. Valid value is SATURDAY_DELIVERY.
TotalCustomsValue	Optional	The total amount to be declared to the Bureau of Customs and Border Protection for International shipping.
RequestType	Optional	Specify the request type.
RequestSource	Optional	Specify the request source.
CourierInstructions	Optional	Specify any courier instructions.
LatestPickupDateTime	Optional	Specify the last possible pickup time and date.
ReadyDateTime	Optional	Specify the time and date the package will be ready for pickup.

Element	Required	Description
TotalCustomsCurrencyType	Optional	The type of currency to be declared to the Bureau of Customs and Border Protection for International shipping.
VersionId	Required	Identifies the version/level of a service operation expected by a caller (in each request) and performed by the callee (in each reply). Valid values are: <ul style="list-style-type: none"> <li>• ServiceId: Identifies a system or sub-system which performs an operation.</li> <li>• Major: Identifies the service business level. For the initial FedEx Web Service release this value should be set to 1.</li> <li>• Intermediate: Identifies the service interface level. For the initial FedEx Web Service release this value should be set to 0.</li> <li>• Minor: Identifies the service code level. For the initial FedEx Web Service release this value should be set to 0.</li> </ul>

### Rating for Multiple-Package Shipment (MPS)

This option is available for FedEx Express U.S. and international multiple-package shipments, FedEx Ground U.S. and international multiple-package shipments, FedEx Express U.S. C.O.D. and international C.O.D. multiple-package shipments, and FedEx Ground U.S. C.O.D. and international C.O.D. multiple-package shipments.

The maximum number of packages in one rate request is 200. For more information about MPS, see Express U.S. Multiple-Package Shipments (MPS).

**RateReply Elements**

Element	Description
ServiceType	Identifies the FedEx service used in shipping the package.
IneligibleForMoneyBackGuarantee	<p>If the service combination you select makes the shipment ineligible for the FedEx money-back guarantee, this element is returned in the reply.</p> <p><b>Note:</b> This element is returned for FedEx Ground shipments only.</p>
OriginServiceArea	<p>Service area commitment code for origin location. This code applies to a limited number of countries for international shipping. Applies to FedEx Express only.</p> <p>Origin service area is returned for both U.S. and international shipments.</p>
DestinationServiceArea	Returns the DestinationAirportID.
TransitTime	Expected number of days in transit. For FedEx International Ground <sup>®</sup> , transit time is an estimate only and depends on the customs clearance times. Applies to FedEx Ground only.
SignatureOption	The signature option for this package.
ActualRateType	<p>The actual rate type of the charges for this package/shipment. Rates are returned in the currency code specified in the rate transaction.</p> <p>Valid rate types are:</p> <ul style="list-style-type: none"> <li>• PAYOR_ACCOUNT_PACKAGE</li> <li>• PAYOR_ACCOUNT_SHIPMENT</li> <li>• PAYOR_LIST_PACKAGE</li> <li>• PAYOR_LIST_SHIPMENT</li> <li>• PAYOR_COUNTER_PACKAGE</li> <li>• PAYOR_COUNTER_SHIPMENT</li> <li>• RATED_ACCOUNT_PACKAGE</li> <li>• RATED_ACCOUNT_SHIPMENT</li> <li>• RATED_LIST_PACKAGE</li> <li>• RATED_LIST_SHIPMENT</li> <li>• RATED_COUNTER_PACKAGE</li> <li>• RATED_COUNTER_SHIPMENT</li> <li>• INCENTIVE</li> </ul> <p>FedEx Express U.S. will return either per-package or per-shipment rates, but not both.</p> <p>FedEx Express International will only return per-shipment rates.</p> <p>FedEx Ground and FedEx Ground International will always return the per-package rate and the per-shipment rate where applicable.</p>
TrackingId	The tracking number.
EffectiveNetDiscount	The difference between account based rates and list rates. Only returned when list rates are requested.
AdjustedCodCollectionAmount	The adjusted collection amount for FedEx Ground <sup>®</sup> C.O.D. This is a package level element.

Element	Description
RatedShipmentDetails	The requested rate information returned in the RatedShipmentDetail element.
RatedShipmentDetail/ ShipmentRateDetail	Shipment level rate information. Currently this is the same as the package level rate information.
RatedShipmentDetail/ ShipmentRateDetail/ ReturnedRateType	Valid value is: <ul style="list-style-type: none"> <li>• INCENTIVE</li> </ul>
ShipmentRateDetail/ DimDivisorType	Identifies the type of dimensional divisor that was applied to the shipment. Valid values are: <ul style="list-style-type: none"> <li>• Country</li> <li>• Customer</li> <li>• Other</li> <li>• Product</li> <li>• Waived</li> </ul>
RatedShipmentDetail/ RatedPackageDetail	If requesting rates using the PackageDetails element (one package at a time) in the request, the rates for each package will be returned in this element. Currently total piece total weight rates are also returned in this element.
RatedWeightMethod	Returned if dimensional weight applies to the rate quote.
RateScale	Applicable rate scale for FedEx Express shipments.
RateZone	Applicable rate zone for FedEx Express shipments.
BillingWeight	Bill rate equals weight plus dimensions calculations when applicable.
DimWeight	Bill rate for dimensional rating.
BaseCharge	Transportation charges before surcharges and discounts.
TotalSurcharges	Total surcharge amount for all additional services.
TotalFreightDiscount	Total discount amount.
NetCharge	Net charge amount.
ServiceOptionType	If applicable, returns Saturday_Delivery.

### ***RateReply Elements***

Element	Description
ServiceType	Identifies the FedEx service used in shipping the package.
IneligibleForMoneyBack Guarantee	If the service combination you select makes the shipment ineligible for the FedEx money-back guarantee, this element is returned in the reply.  <b>Note:</b> This element is returned for FedEx Ground shipments only.

Element	Description
OriginServiceArea	Service area commitment code for origin location. This code applies to a limited number of countries for international shipping. Applies to FedEx Express only.  Origin service area is returned for both U.S. and international shipments.
DestinationServiceArea	Returns the DestinationAirportID.
TransitTime	Expected number of days in transit. For FedEx International Ground®, transit time is an estimate only and depends on the customs clearance times. Applies to FedEx Ground only.
SignatureOption	The signature option for this package.
ActualRateType	The actual rate type of the charges for this package/shipment. Rates are returned in the currency code specified in the rate transaction. Valid rate types are: <ul style="list-style-type: none"> <li>• PAYOR_ACCOUNT_PACKAGE</li> <li>• PAYOR_ACCOUNT_SHIPMENT</li> <li>• PAYOR_LIST_PACKAGE</li> <li>• PAYOR_LIST_SHIPMENT</li> <li>• PAYOR_COUNTER_PACKAGE</li> <li>• PAYOR_COUNTER_SHIPMENT</li> <li>• RATED_ACCOUNT_PACKAGE</li> <li>• RATED_ACCOUNT_SHIPMENT</li> <li>• RATED_LIST_PACKAGE</li> <li>• RATED_LIST_SHIPMENT</li> <li>• RATED_COUNTER_PACKAGE</li> <li>• RATED_COUNTER_SHIPMENT</li> </ul> FedEx Express U.S. will return either per-package or per-shipment rates, but not both. FedEx Express International will only return per-shipment rates. FedEx Ground and FedEx Ground International will always return the per-package rate and the per-shipment rate where applicable.
TrackingId	The tracking number.
EffectiveNetDiscount	The difference between account based rates and list rates. Only returned when list rates are requested.
AdjustedCodCollectionAmount	The adjusted collection amount for FedEx Ground® C.O.D. This is a package level element.
RatedShipmentDetails	The requested rate information returned in the RatedShipmentDetail element.
RatedShipmentDetail/ ShipmentRateDetail	Shipment level rate information. Currently this is the same as the package level rate information.

Element	Description
ShipmentRateDetail/ DimDivisorType	Identifies the type of dimensional divisor that was applied to the shipment. Valid values are: <ul style="list-style-type: none"> <li>• Country</li> <li>• Customer</li> <li>• Other</li> <li>• Product</li> <li>• Waived</li> </ul>
RatedShipmentDetail/ RatedPackageDetail	If requesting rates using the PackageDetails element (one package at a time) in the request, the rates for each package will be returned in this element. Currently total piece total weight rates are also returned in this element.
RatedWeightMethod	Returned if dimensional weight applies to the rate quote.
RateScale	Applicable rate scale for FedEx Express shipments.
RateZone	Applicable rate zone for FedEx Express shipments.
BillingWeight	Bill rate equals weight plus dimensions calculations when applicable.
DimWeight	Bill rate for dimensional rating.
BaseCharge	Transportation charges before surcharges and discounts.
TotalSurcharges	Total surcharge amount for all additional services.
TotalFreightDiscount	Total discount amount.
NetCharge	Net charge amount.
ServiceOptionType	If applicable, returns Saturday_Delivery.

### **Possible Surcharges**

The following table lists possible surcharges returned in the Rate reply for applicable FedEx service options:

Possible Surcharges	Possible Surcharges
Signature_Option	GST (Global sales tax for Canadian origin)
Home_Delivery_Appointment	Dangerous_Goods
Home_Delivery_Evening	Out_Of_Delivery_Area
Home_Delivery_Date_Certain	Out_Of_Pickup_Area
Non_Standard_Container	Offshore
Hazardous_Materials	Inside_Delivery
Residential	Inside_Pickup
COD	FICE (FedEx International Controlled Export)
Saturday_Delivery	VAT
Saturday_Pickup	Export

Possible Surcharges	Possible Surcharges
Insured_Value — FedEx declared-value charges are returned in this element. FedEx does not provide insurance of any kind.	Other
Oversize	VariableHandlingCharges — If you specify additional handling charges in the rate quote, charges are returned in the Rate reply.
Return_Label	TotalCustomerCharge — Contains the discounted net freight charge plus the variable handling charge amount.

Regional_Mall_Pickup	Metro_Pickup
Overdimension	Island_Delivery
Tarp	Island_Pickup
Metro_Delivery	

**Note:** See [Surcharges and Discounts](#) for more information about surcharges and rate calculations.

### ***Rate Surcharge Return***

Surcharges are returned in the Rate reply and in the Ship reply as follows:

- Total surcharge
- Total taxes (for Canadian origin shipments)
- Total discounts
- Itemized surcharge

**XML Schema**See [Schema RateService](#).**Surcharges and Discounts**

Your shipment may incur fees in addition to the base shipping rate depending on the service options you choose. The following are descriptions of those fees that are returned in the rate quote.

Surcharge	Description	Applicable Services
Additional Handling Dimension Surcharge	For FedEx Express, shipment measures greater than 60 inches in length but equal to or less than 108 inches in length. For FedEx Ground, shipment measures greater than 60 inches in length but equal to or less than 108 inches;	FedEx Priority Overnight <sup>®</sup> , FedEx Standard Overnight <sup>®</sup> , FedEx 2Day <sup>®</sup> , FedEx Express Saver <sup>®</sup> , FedEx Ground <sup>®</sup> , FedEx International Ground <sup>®</sup>
Additional Handling Weight Surcharge	For FedEx Ground or FedEx Express, shipment has an actual weight of greater than 70 lbs.	FedEx Priority Overnight, FedEx Standard Overnight, FedEx 2Day, FedEx Express Saver, FedEx Ground, FedEx International Ground
Additional Handling Packaging Surcharge	For FedEx Express, shipment is not fully encased in an outer shipping container and/or is encased in packing material other than corrugated cardboard. For FedEx Ground, shipment is not fully encased in an outer shipping container and/or is encased in packing material other than corrugated cardboard.	FedEx Priority Overnight, FedEx Standard Overnight, FedEx 2Day, FedEx Express Saver, FedEx Ground, FedEx International Ground
Broker Select Option	A fee applies to B13A for Canada Export Shipping shipment if you choose to have FedEx complete the delivery after customs clearance and if your recipient and customs broker are served by different FedEx clearance points.	FedEx International Priority <sup>®</sup> , FedEx International Economy <sup>®</sup> , FedEx International Priority <sup>®</sup> Freight, FedEx International Economy <sup>®</sup> Freight
Courier Pickup Charge	A charge applies when you request a pickup. This charge does not apply if you drop off your package at a FedEx shipping location or if you have regular scheduled pickups.	

Surcharge	Description	Applicable Services
Dangerous Goods	FedEx assesses a surcharge on each package containing dangerous-goods materials. For intra-Canada shipments this surcharge is also based on the type of service provided.	FedEx Express, FedEx Priority Overnight, FedEx First Overnight <sup>®</sup> , FedEx 2Day <sup>®</sup> , FedEx International Economy <sup>®</sup> and FedEx International Economy <sup>®</sup> Freight
Declared Value	FedEx liability for each package is limited to \$100USD unless a higher value is declared and paid for. For each package exceeding \$100USD in declared value, an additional amount will be charged. FedEx does not provide insurance of any kind.	FedEx Express and FedEx Ground shipments
Delivery Area Surcharge	A delivery area surcharge applies to shipments destined for select U.S. postal codes. (This surcharge does not apply to FedEx Ground Multiweight shipments.) In addition, a delivery area surcharge applies to FedEx Express shipments destined for areas in Alaska that are remote, sparsely populated, or geographically difficult to access.	FedEx Priority Overnight, FedEx Standard Overnight, FedEx 2Day, FedEx Express Saver, FedEx Ground, FedEx Home Delivery <sup>®</sup>
Dimensional Weight	<p>For FedEx Express shipments: FedEx may assess shipping charges based on the International Air Transport Association (IATA) volume standard. Dimensional weight is calculated by multiplying the length by width by height of each package in inches and dividing the total by 194 (for shipments within the U.S. and shipments between the U.S. and Puerto Rico) or 186 (for international shipments). If the dimensional weight exceeds the actual weight, charges may be assessed based on the dimensional weight. Shipments in FedEx packaging may also be subject to dimensional-weight pricing.</p> <p>For Ground shipments: Dimensional weight may apply to FedEx Ground packages that are 3 cubic feet (5,184 cubic inches) or larger. Multiply the length by width by height of each package in inches. If the total is 5,184 inches or greater, calculate dimensional weight by dividing by 194 (for shipments within the U.S. and Puerto Rico) and 166 (for shipments to Canada).</p>	FedEx Express and FedEx Ground shipments
Duties and Taxes	Duties and taxes, including goods and services tax (GST) and value-added tax (VAT) may be assessed on the contents of the shipment.	FedEx Express International package and freight service

Surcharge	Description	Applicable Services
FedEx <sup>®</sup> Collect on Delivery (C.O.D.)	If you request FedEx to obtain payment from the recipient at the time the shipment is delivered, an additional surcharge is applied.	FedEx Express and FedEx Ground shipments
FedEx Ground <sup>®</sup> Electronic C.O.D. (E.C.O.D.)	A charge applies when you direct FedEx to collect payment from your recipient and deposit it directly into your bank account.	FedEx Ground shipments
FedEx <sup>®</sup> Delivery Signature Options	FedEx provides five options when you need a signature upon delivery: Indirect Signature Required, Direct Signature Required, Adult Signature Required, Service Default and No Signature Required. Indirect Signature Required is allowed to U.S. residential addresses only. Direct Signature Required is allowed to U.S. addresses and when shipping FedEx Ground to Canadian addresses. Adult Signature Required is allowed to U.S. addresses. Service Default tells the courier to perform the customer's usual request for signature collection.	FedEx Express shipments to U.S. addresses and FedEx Ground shipments to U.S. and Canadian addresses
FedEx E-Mail Return Label	A charge applies in addition to shipping charges once the recipient uses the return label. This service is only available for U.S. shipments.	FedEx First Overnight, FedEx Priority Overnight, FedEx Standard Overnight, FedEx 2Day, FedEx Ground, FedEx 2Day <sup>®</sup> Freight, FedEx 3Day <sup>®</sup> Freight
FedEx <sup>®</sup> ExpressTag	A charge applies in addition to shipping charges when FedEx picks up the package for return at your recipient's location. This service is only available for U.S. shipments.	FedEx Priority Overnight, FedEx Standard Overnight, FedEx 2Day
FedEx Ground Alternate Pickup Address	FedEx may provide pickup service to an address other than the shipping location associated with the FedEx Ground account number.	FedEx Ground (U.S. and Canada)
FedEx Ground <sup>®</sup> Call Tag	A charge applies in addition to shipping charges when FedEx picks up the packages for return at your recipient's location. This service is only available for U.S. shipments.	FedEx Ground, FedEx Home Delivery
FedEx Home Delivery Convenient Delivery Options	You can choose FedEx Home Delivery Convenient Delivery Options: 1) FedEx Date Certain Home Delivery <sup>®</sup> , 2) FedEx Evening Home Delivery <sup>®</sup> , 3) FedEx Appointment Home Delivery <sup>®</sup> .	FedEx Home Delivery

Surcharge	Description	Applicable Services
FedEx International Controlled Export (FICE)	A charge applies when you select FICE for shipments moving under a U.S. State Department (DSP) license or under U.S. Drug Enforcement Administration permits 36, 236, and 486. This charge also applies for inbound shipments moving under a transportation and exportation customs form (CF7512) from a foreign trade zone or bonded warehouse.	FedEx International Priority, FedEx International Priority Freight
FedEx <sup>®</sup> Print Return Label	A charge applies in addition to shipping charges once the recipient has used the return label. This service is only available for U.S. shipments.	FedEx First Overnight, FedEx Priority Overnight, FedEx Standard Overnight, FedEx 2Day, FedEx Ground, FedEx 2Day Freight, FedEx 3Day Freight
Extended Service Area Delivery/Pickup	Shipments delivered to or picked up from points outside the FedEx primary service area are assessed an extended service area delivery charge. In addition, delivery or pickup from select highly congested metro area postal codes will be assessed a metro service area charge.	Intra-Canada Express Service
Oversize Charge	<p>FedEx Express: The maximum limits for FedEx Express U.S. packages are 150 lbs and 119 inches in length and 165 inches in length and girth. Packages that weigh 150 lbs or less and exceed 108 inches in length or 130 inches in length and girth are considered "oversize" packages. Oversize packages are rated based on the greater of the package's actual rounded weight or dimensional weight.</p> <p>Ground: A package weighing 150 lbs or less and measuring greater than 130 inches in length and girth is classified as an oversize package. The shipping charges for an oversize package are based on the greater of the package's actual rounded weight or its dimensional weight.</p> <p>Home Delivery: The shipping charge for any package with a dimensional weight of greater than 70 lbs is the same as a FedEx Ground package of the corresponding dimensional weight being shipped under the same circumstances.</p>	FedEx Ground and FedEx Home Delivery
Residential Surcharge	A residential package surcharge applies to shipments to a home or private residence, including locations where a business is operated from a home.	FedEx Express, FedEx Ground, FedEx International Ground (Canada only), FedEx International Premium <sup>®</sup>
Rural Delivery (Alaska and Hawaii)	A surcharge applies for delivery to select rural postal codes in Alaska and Hawaii.	FedEx Ground U.S.

Surcharge	Description	Applicable Services
Saturday Delivery/ Saturday Pickup	<a href="#">Saturday Service</a> is available for an additional charge depending on the package service type and origin/destination pair.	FedEx Priority Overnight, FedEx 2Day, FedEx International Priority, FedEx 1Day <sup>®</sup> Freight, FedEx 2Day Freight
Dry Ice Surcharge	A surcharge will be applied for dry-ice packaging.	FedEx International Priority, FedEx International Economy, and FedEx International Economy <sup>®</sup> Freight services
Fuel Surcharge	<p>The fuel surcharge percentage for FedEx Express services is subject to monthly adjustment based on a rounded average of the U.S. Gulf Coast (USGC) spot price for a gallon of kerosene-type jet fuel.</p> <p>The fuel surcharge percentage for FedEx Ground services is subject to monthly adjustment based on a rounded average of the national U.S. on-highway average price for a gallon of diesel fuel.</p>	FedEx Express, FedEx Ground, and FedEx Home Delivery

**Note:** For more information about FedEx terms and conditions, including surcharges, see [fedex.com/us/services/terms/](https://fedex.com/us/services/terms/).

## FedEx Discount Programs

The following discount programs are offered by FedEx and are calculated in your rate quote:

Discount Program	Description
FedEx Ground Multiweight	<p>FedEx Ground Multiweight is ideal for multiple-package shipments moving as one unit to the same destination on the same day. This pricing option allows you to combine packages for a multiweight rate. Pricing is based on the combined weight of your packages. For more information about FedEx Ground Multiweight requirements, see <a href="https://fedex.com/us/services/options/multiweight/groundmultiweight.html">fedex.com/us/services/options/multiweight/groundmultiweight.html</a>.</p> <p><b>Note:</b> To help calculate multiweight discounts, you can download the FedEx Ground Multiweight utility at <a href="https://fedex.com/us/solutions/multiweight">fedex.com/us/solutions/multiweight</a>.</p>
Earned Discounts Pricing Program	The Earned Discounts Pricing Program awards discounts when you meet predetermined revenue levels and/or shipping criteria. You earn additional discounts as you increase shipping activity or due to specific shipment characteristics. Earned discounts are also available for FedEx SmartPost shipping.

**Note:** For more information on pricing programs, contact your FedEx account executive.

complexType **Commodity**

diagram

For international multiple piece shipments, commodity information must be passed in the Master and on each child transaction. If this shipment contains more than four commodities line items, the four highest valued should be included in the first 4 occurrences for this request.

<b>ns:Name</b>	total number of pieces of this commodity
<b>ns:NumberOfPieces</b>	total number of pieces of this commodity
<b>ns:Description</b>	Complete and accurate description of this commodity.
<b>ns:CountryOfManufacture</b>	Country code where commodity contents were produced or manufactured in their final form.
<b>ns:HarmonizedCode</b>	Unique alphanumeric representing commodity item. At least one occurrence is required for US Export shipments if the Customs Value is greater than \$2500 or if a valid US Export license is required.
<b>ns:Weight</b>	Total weight of this commodity. 1 explicit decimal position. Max length 11 including decimal.
<b>ns:Quantity</b>	Number of units of a commodity in total number of pieces for this line item. Max length is 9
<b>ns:QuantityUnits</b>	Unit of measure used to express the quantity of this commodity line item.
<b>ns:AdditionalMeasures</b>	0..∞ Contains only additional quantitative information other than weight and quantity to calculate duties and taxes.
<b>ns:UnitPrice</b>	Value of each unit in Quantity. Six explicit decimal positions. Max length 18 including decimal.
<b>ns:CustomsValue</b>	Total customs value for this line item. It should equal the commodity unit quantity times commodity unit value. Six explicit decimal positions, max length 18 including decimal.
<b>ns:ExciseConditions</b>	0..∞ Defines additional characteristic of commodity used to calculate duties and taxes
<b>ns:ExportLicenseNumber</b>	Applicable to US export shipping only.
<b>ns:ExportLicenseExpirationDate</b>	
<b>ns:CIMarksAndNumbers</b>	An identifying mark or number used on the packaging of a shipment to help customers identify a particular shipment.
<b>ns:NaftaDetail</b>	All data required for this commodity in NAFTA Certificate of Origin.

complexType **FreightServiceCenterDetail**

diagram

**FreightServiceCenterDetail**

This class describes the relationship between a customer-specified address and the FedEx Freight / FedEx National Freight Service Center that supports that address.

**ns:InterlineCarrierCode**

Freight Industry standard non-FedEx carrier identification

**ns:InterlineCarrierName**

The name of the Interline carrier.

**ns:AdditionalDays**

Additional time it might take at the origin or destination to pickup or deliver the freight. This is usually due to the remoteness of the location. This time is included in the total transit time.

**ns:LocalService**

Service branding which may be used for local pickup or delivery, distinct from service used for line-haul of customer's shipment.

**ns:LocalDistance** +

Distance between customer address (pickup or delivery) and the supporting Freight / National Freight service center.

**ns:LocalDuration**

Time to travel between customer address (pickup or delivery) and the supporting Freight / National Freight service center.

**ns:LocalServiceScheduling**

Specifies when/how the customer can arrange for pickup or delivery.

**ns:LimitedServiceDays**

0..∞

Specifies days of operation if localServiceScheduling is LIMITED.

**ns:GatewayLocationId**

Freight service center that is a gateway on the border of Canada or Mexico.

**ns:Location**

Alphabetical code identifying a Freight Service Center

**ns:ContactAndAddress** +

Freight service center Contact and Address

namespace <http://fedex.com/ws/rate/v9>

complexType **RequestedPackageLineItem**

diagram

**RequestedPackageLineItem**

This class rationalizes RequestedPackage and RequestedPackageSummary from previous interfaces. The way in which it is used within a RequestedShipment depends on the RequestedPackageDetailType value specified for that shipment.

**ns:SequenceNumber**

Used only with INDIVIDUAL\_PACKAGE, as a unique identifier of each requested package.

**ns:GroupNumber**

Used only with PACKAGE\_GROUPS, as a unique identifier of each group of identical packages.

**ns:GroupPackageCount**

Used only with PACKAGE\_GROUPS, as a count of packages within a group of identical packages.

**ns:VariableHandlingChargeDetail** ⊕**ns:InsuredValue** ⊕

Only used for INDIVIDUAL\_PACKAGES and PACKAGE\_GROUPS. Ignored for PACKAGE\_SUMMARY, in which case totalInsuredValue and packageCount on the shipment will be used to determine this value.

**ns:Weight** ⊕

Only used for INDIVIDUAL\_PACKAGES and PACKAGE\_GROUPS. Ignored for PACKAGE\_SUMMARY, in which case totalWeight and packageCount on the shipment will be used to determine this value.

**ns:Dimensions** ⊕**ns:PhysicalPackaging**

Provides additional detail on how the customer has physically packaged this item. As of June 2009, required for packages moving under international and SmartPost services.

**ns:ItemDescription**

Human-readable text describing the package.

**ns:CustomerReferences** ⊕

0..3

**ns:SpecialServicesRequested** ⊕**ns:ContentRecords** ⊕

0..∞

Only used for INDIVIDUAL\_PACKAGES and PACKAGE\_GROUPS.

## complexType RequestedShipment

diagram	<p><b>RequestedShipment</b></p> <p>the descriptive data for the shipment being requested to FedEx.</p> <p><b>ns:ShipTimestamp</b>  Identifies the date and time the package is intended to be shipped. Both the date and time portions of the data are expected to be used. The data should not be a past date or a date more than 30 days in the future. The time is the local time of the originator. The time of the shipper's time zone. The data component must be in the format YYYYMMDD (e.g. 2006-05-26). The time component must be in the format HHMMSS (e.g. 1345). A time is 11:00:00, volume 5:00 pm, 17:00:00. The date and time parts are separated by the letter T (e.g. 2006-05-26T17:00:00). There is also a UTC offset component indicating the number of hours/difference from UTC (e.g. 2006-05-26T17:00:00-0400 is offset from June 26, 2006 5:00 pm Eastern Time).</p> <p><b>ns:DropoffType</b>  Identifies the method by which the package is to be rendered to FedEx. This element does not dispatch a carrier for package pickup; use <b>ns:CarrierType</b> for list of valid enumerated values.</p> <p><b>ns:ServiceType</b>  Identifies the service to be used in shipping the package. See <b>ns:CarrierType</b> for list of valid enumerated values.</p> <p><b>ns:PackagingType</b>  Identifies the packaging used by the shipper for the package. See <b>ns:CarrierType</b> for list of valid enumerated values.</p> <p><b>ns:TotalWeight</b>  Identifies the total weight of the shipment being requested to FedEx. This is only applicable to international shipments and should only be used on the first package of a multiple piece shipment. This value contains 1 single decimal position.</p> <p><b>ns:TotalInsuredValue</b>  Total insured amount.</p> <p><b>ns:Shipper</b>  Descriptive data identifying the party responsible for shipping the package. Shipper and Origin should have the same address.</p> <p><b>ns:Recipient</b>  Descriptive data identifying the party receiving the package.</p> <p><b>ns:RecipientLocationNumber</b>  A unique identifier for a recipient location.</p> <p><b>ns:Origin</b>  Physical starting address for the shipment. If different from shipper's address.</p> <p><b>ns:ShippingChargesPayment</b>  Descriptive data identifying the method and means of payment to FedEx for providing shipping service.</p> <p><b>ns:SpecialServicesRequested</b>  Descriptive data specifying special services requested for the shipper for this shipment. If the shipper is requesting a special service which requires additional data (e.g. COD), the special service type must be present in the <b>ns:SpecialServicesRequested</b> type collection, and the supporting data must be provided in the appropriate <b>ns:SpecialServiceDetail</b> object. For example, request COD, "COD" must be included in the <b>ns:SpecialServicesRequested</b> type collection and the <b>ns:CODDetail</b> object must contain the required data.</p> <p><b>ns:ExpressFreightDetail</b>  Details specific to an Express Freight shipment.</p> <p><b>ns:FreightShipmentDetail</b>  Data applicable to shipments using FEDEX FREIGHT and FEDEX MATTOON/FREIGHT service.</p> <p><b>ns:DeliveryInstructions</b>  Used with Ground Home Delivery and Freight.</p> <p><b>ns:VariableHandlingChargeDetail</b>  Details about how to allocate variable handling charges at the shipment level.</p> <p><b>ns:CustomsClearanceDetail</b>  Customs clearance data, used for both international and time-sensitive shipping.</p> <p><b>ns:PickupDetail</b>  For use in "next-business-day" transaction.</p> <p><b>ns:SmartPostDetail</b>  Details about the SmartPost service.</p> <p><b>ns:BlockInsightVisibility</b>  If true, only the shipper will have visibility of this shipment.</p> <p><b>ns:LabelSpecification</b>  Details about the label format and printer type the label is to be rendered.</p> <p><b>ns:ShippingDocumentSpecification</b>  Details such as shipping document type, NAFTA information, CI information, and GAA information.</p> <p><b>ns:RateRequestTypes</b>  0-9  Specifies whether and what kind of rate the customer wishes to have quoted on this shipment. The reply will also be constrained by other data on the shipment and customer.</p> <p><b>ns:OfferRequestType</b>  Specifies whether the customer wishes to have Estimated Dating and Transit provided with the rate quotation on this shipment. Only applies with shipper moving under international service.</p> <p><b>ns:PackageCount</b>  For a multiple piece shipment this is the total number of packages in the shipment.</p> <p><b>ns:PackageDetail</b>  Describes whether packages are described individually, in groups, or summarized by a simple description for individual items. This field controls which fields of the <b>ns:PackageDetail</b> object will be used, and how many occurrences are expected.</p> <p><b>ns:RequestedPackageItemName</b>  0-999  One or more package attribute descriptors each of which describes an individual package, a group of identical packages, or the total piece count weight unit control. Descriptors of packages in the shipment.</p>

## complexType ShipmentSpecialServicesRequested

diagram

### ShipmentSpecialServicesReque...

These special services are available at the shipment level for some or all service types. If the shipper is requesting a special service which requires additional data (such as the COD amount), the shipment special service type must be present in the specialServiceTypes collection, and the supporting detail must be provided in the appropriate sub-object below.

#### ns:SpecialServiceTypes

0..∞

The types of all special services requested for the enclosing shipment (or other shipment-level transaction).

#### ns:CodDetail

Descriptive data required for a FedEx COD (Collect-On-Delivery) shipment. This element is required when SpecialServiceType.COD is present in the SpecialServiceTypes collection.

#### ns:HoldAtLocationDetail

Descriptive data required for a FedEx shipment that is to be held at the destination FedEx location for pickup by the recipient. This element is required when SpecialServiceType.HOLD\_AT\_LOCATION is present in the SpecialServiceTypes collection.

#### ns:EmailNotificationDetail

Descriptive data required for FedEx to provide email notification to the customer regarding the shipment. This element is required when SpecialServiceType.EMAIL\_NOTIFICATION is present in the SpecialServiceTypes collection.

#### ns:ReturnShipmentDetail

The descriptive data required for FedEx Printed Return Label. This element is required when SpecialServiceType.PRINTED\_RETURN\_LABEL is present in the SpecialServiceTypes collection.

#### ns:PendingShipmentDetail

This field should be populated for pending shipments (e.g. e-mail label). It is required by a PENDING\_SHIPMENT special service type.

#### ns:ShipmentDryIceDetail

The number of packages with dry ice and the total weight of the dry ice.

#### ns:HomeDeliveryPremiumDetail

The descriptive data required for FedEx Home Delivery options. This element is required when SpecialServiceType.HOME\_DELIVERY\_PREMIUM is present in the SpecialServiceTypes collection.

#### ns:FlatbedTrailerDetail

#### ns:FreightGuaranteeDetail

#### ns:EtdDetail

Electronic Trade document references.

#### ns:CustomDeliveryWindowDetail

Specification for date or range of dates on which delivery is to be attempted.
